## What are Green Careers?

There are lots of ways to think about green jobs. Here, we look at the definition used by the U.S. Department of Labor's Occupational Information Network (O\*NET).

A **green** career can be any occupation that is affected by activities such as conserving energy, developing alternative energy, reducing pollution, or recycling. Green careers fall into three groups:

### Higher Demand Green Occupations

In these fields, the job duties aren't changing but the occupation itself will probably grow because of the increased demand for green goods and services. Some examples include:

**Bus Drivers**, who will be needed to fill an increased demand for public transit.

**Agricultural Inspectors**, who will help meet the increased demand for organic and sustainable farming techniques, and new government regulations.

**Carpenters and Carpenter Helpers**, who will be needed to work on green construction or retrofitting projects.

### Changing Skills Green Occupations

These fields are adding new tasks or specialty areas because of the demand for green goods and services. Some examples include:

**Construction Managers**, who may need to learn more about green construction and retrofitting.

**Public Relations Specialists**, who may need to develop expertise in marketing green products or services.

**Farmers and Ranchers**, who may need to expand sustainable farming practices.

### New Green Occupations

New Green occupations are those that are emerging because of green trends. Some examples include:

**Energy Auditors**, who conduct audits to determine how energy-efficient homes or buildings are.

**Chief Sustainability Officers**, who oversee green activities at their organizations.

**Wind Energy Engineers**, who design and develop wind farm systems.

## Applicant Pool

Top 20 Occupations Desired by Applicants on Their Resumes in the Past 12 Months in Region 7

1 Customer Service Representatives	268
2 Office Clerks, General	182
3 Cashiers	178
4 Production Workers, All Other	175

## Explore Green Careers

There are more than 200 **green** careers in these twelve sectors below.

**Renewable Energy Generation:** Includes careers related to developing and using energy sources such as solar, wind, geothermal, and biomass. This sector also includes traditional, non-renewable sources of energy undergoing significant green technological changes (e.g., oil, coal, gas, and nuclear).

**Transportation:** Includes careers related to increasing efficiency and/or reducing environmental impact of various modes of transportation including trucking, mass transit, freight rail, and so forth.

**Energy Efficiency:** Includes careers related to increasing energy efficiency (broadly defined), making energy demand response more effective, constructing “smart grids,” and so forth.

**Green Construction:** Includes careers related to constructing new green buildings, retrofitting residential and commercial buildings, and installing other green construction technology.

**Energy Trading:** Includes careers related to buying and selling energy as an economic commodity, as well as carbon trading projects.

**Energy and Carbon Capture and Storage:** Includes careers related to capturing and storing energy and/or carbon emissions, as well as technologies related to power plants using the integrated gasification combined cycle (IGCC) technique.

**Research, Design, and Consulting Services:** This sector encompasses “indirect jobs” to the green economy which includes activities such as energy consulting or research and other related business services.

**Environment Protection:** Includes careers related to environmental remediation, climate change adaptation, and ensuring or enhancing air quality.

**Agriculture and Forestry:** Includes careers related to using natural pesticides, efficient land management or farming, and aquaculture.

**Manufacturing:** Includes careers related to industrial manufacturing of green technology as well as energy efficient manufacturing processes.

**Recycling and Waste Reduction:** Includes careers related to solid waste and wastewater management, treatment, and reduction, as well as processing recyclable materials.

**Governmental and Regulatory Administration:** Includes careers by public and private organizations associated with conservation and pollution prevention, regulation enforcement, and policy analysis and advocacy.
